

# Equipment Qualification

## Complete Testing Solutions

### EQ Tests

- Loss of Cooling Accident (LOCA)
- HELB/MSLB
- Vibration Aging
- Humidity Chambers
- Thermal Aging Ovens
- Steam Test Simulators
- Post LOCA Submergence Chamber
- Radiation Testing
- Mechanical/Electrical Cycling
- EMI/RFI Testing
- Seismic Qualification Testing
- Side Load Testing

### Quality Programs

- ASME NQA-1
- ANSI N45.2
- ASME B31.1
- ASME Section IX
- AWS
- 10CFR50 Appendix B
- 10CFR21
- CSA N285
- CSA B51
- CSA N299.1-16
- NUPIC and NIAC Audited

Curtiss-Wright offers a distinguished set of Equipment Qualification (EQ) capabilities for harsh and mild environments. Our Qualification Center is fully equipped for in-house testing for a broad range of components and assemblies. Throughout our many years of practice, we have developed an extensive library of qualification test procedures and reports.
