Cutting-Edge Seismic Solutions

Curtiss-Wright has developed a robust project management team, with experience successfully completing projects for the Department of Energy, CANDU nuclear plants, OPG Refurbishment activities and Bruce Power MCR. Our quality assurance programs are regularly audited by NUPIC and meet both the CSA N299.1-2016 and 10CFR50 Appendix B requirements for Canada and the United States. Choosing our engineering project management services for nuclear projects means selecting a trusted partner committed to delivering outstanding results. With our wealth of experience, technical expertise, and dedication to excellence, we exceed expectations and contribute to the success of CANDU reactor projects, DOE projects, and international reactor projects.

Project Management Services

- **Project Planning and Execution:** Our experienced project managers excel in developing comprehensive project plans, adhering to schedules, managing resources effectively, and coordinating project completion. We prioritize seamless project execution and successful outcomes.
- **Regulatory Compliance:** We possess in-depth knowledge of CANDU reactor regulations and Department of Energy standards, working closely with regulatory bodies to ensure compliance. Our services assist clients in navigating complex regulatory landscapes, mitigating risks, and maintaining compliance throughout projects.
- **Design and Engineering Services:** From concept development to detailed design and engineering analysis, we provide innovative solutions to optimize reactor performance, enhance safety measures, and improve operational efficiency.
- **Procurement and Supply Chain Management:** We understand the significance of effective procurement and supply chain management. Our team collaborates closely with suppliers to ensure timely delivery of quality materials and equipment. We employ robust quality control measures and inspection processes to maintain compliance with project specifications and industry standards.
- **Construction Oversight:** Our engineering project management services extend to the construction and commissioning phases. We provide on-site support, oversee construction activities, conduct quality inspections, and ensure adherence to project schedules. Our goal is to facilitate a smooth transition from construction to operational readiness.
