

Nuclear Power Products and Services

About

For over 55 years, Curtiss-Wright has manufactured and supplied an extensive range of ASME Code, safety-related, NQA-1, and commercial-grade fasteners for the U.S. Department of Energy, commercial nuclear and fossil power plants, the Department of Defense, and the industrial market. We deliver standard and specialty fastener solutions in any size and alloy to support both new construction and critical component replacements.

With decades of industry expertise, we develop and deliver fastener solutions that support safe operations and equipment reliability, and comply with regulatory requirements. As the nuclear industry advances, Curtiss-Wright remains ready and equipped to meet the evolving demands of Advanced Reactors and Small Modular Reactor Development.

Fastener Solutions

- Hex and heavy hex bolts
- Structural bolts
- Shoulder bolts
- Lock bolts
- U-bolts
- Bent bolts
- Eyebolts
- Heavy hex screws
- Hex head cap screws
- Machine screws
- Set screws
- Hex socket head cap screws
- 12-point screws
- Tapping screws
- Hex and heavy hex nuts
- Cap nuts
- Lock nuts
- Wing nuts
- Machine screw nuts
- Full thread studs
- Tension studs
- Double end studs
- Manway studs
- Vessel studs
- Flat washers
- Lock washers
- Tab washers
- Beveled washers
- Headless and headed pins
- Rivets
- Rod end and threaded rod

Features and Benefits

- ASME NQA-1 Certified
- Compliant with the Buy American Act (FAR-52.225-11)
- Meets the Fastener Quality Act of 1999 (PL-106-34)
- ISO 9001 without Design Certified
- Anti-Fraud / Falsification Procedures
- Suspect / Counterfeit Part Prevention Procedures
- ASME Sections III and XI Certified
- Safety-Related 10CFR50 Appendix B; 10CFR20
- Commercial Grade Dedication Program
- Diversified Spend Program
- Custom Machined Components
- Full Machining Center Including:
 - 24 CNC Turning Centers
 - 5 CNC Milling Centers
 - 6 Thread Rolling
 - 2 Waterjet Cutting Machines
- Material Traceability
 - Mill
 - Lot Number
 - Heat Number
 - Heat Codes
