

Gasket Table and Packing Cabinet

Comprehensive Maintenance Solutions

**CURTISS -
WRIGHT**

Maintenance Simplified

In the world of industrial maintenance, efficiency starts with having the right tools and materials close at hand. Our gasket tables provide a durable, organized workspace for cutting and replacing sealing materials. The custom packing cabinets are stocked with site-specific and commonly used packing material for quick, easy access. Together, they keep essential sealing supplies organized to simplify maintenance tasks and optimize operations.

Gasket Table

Curtiss-Wright's gasket table features solid steel construction that ensures durability and longevity. With six roll holders and seven shelves, this gasket table offers ample storage space for all your gasketing needs. Additionally, the clamp and two swinging arms affixed next to the thick composite top make cutting gasket materials simple and safe.

The table's large working space allows for easy access and efficient cutting, and the adjustable feet ensure a level working space wherever the table is installed. Whether you are working on a routine maintenance task or a complex retrofit job, our gasket table is designed to meet the demands of a challenging plant environment.

Table Technical Specifications

Property	Specification
Table Top Dimensions	61" x 70"
Table Top Material	.75" Thick High Density Polyethylene
Shelf Dimensions	61" x 61"
Roll Holder Rod Length	60"
Rod Specifications	12.75" between rods
Weight Rating	8,000 lbs.
Wheel Specifications	Glass-filled nylon with swivel lock casters

Customizable Packing Cabinet

Curtiss-Wright's packing cabinets are fully customizable and tailored to your site's specifications. Each cabinet is carefully stocked with a selection of braided end rings and die-formed flexible graphite sealing rings to meet your unique operational requirements.

In addition to site-specific materials, cabinets are stocked with common valve packing sizes and materials, providing quick, easy access to the packing your team uses most.

By keeping both custom and standard packing organized and on hand, our cabinets help to reduce downtime, minimize expediting costs, and provide immediate access to materials when you need them. Maintenance tasks can become faster, simpler, and more efficient.

Cabinet Specifications

Property	Specification
Cabinet Dimensions	40" T X 22.50" D X 59.50" W
4" Drawers	6
5" Drawers	5
Drawer Compartments	177
Weight Capacity	440 lbs. per drawer
