

Nuclear Power Industry

Products and Services

Scan QR code for more information.

Curtiss-Wright Nuclear Division offers a comprehensive range of products and services that support the global nuclear power industry. Our advanced technologies and innovative solutions have been used in operating reactors for over 55 years, sustaining the safe and reliable operation of nuclear plants throughout the world. We continuously provide technologies and experience in support of Plant Life Extension and Extended Power Uprate programs, and offer proactive solutions to critical plant obsolescence issues.

Our Quality Assurance programs are maintained at the highest standards of excellence in support of rigorous industry requirements. We meet 10CFR50, Appendix B; 10CFR20; ASME NQA-1; and ASME Sections III and XI. We possess ASME N, NPT, NR, NS, UV, and VR Certificates, including Material Organization (QSC-614) capabilities. Our international quality programs meet the requirements for Canada, France, China, and Russia, and are NUPIC-and NIAC-audited.

We have invested in new companies, new technology, expanded technical staffing and infrastructure to strengthen our capabilities and industry support. Our business units provide unmatched knowledge, experience and technical superiority, making Curtiss-Wright's Nuclear Division ready and able to meet the demands of existing operating reactors, as well as the future fleet of nuclear power plants.

Curtiss-Wright Nuclear Division has proven its long-term commitment to serve the nuclear power industry. We will be there in the future to provide next-generation technology, equipment, services and experience, and we stand ready to support our industry's complex and evolving requirements.

Products

Actuators

- Electro-Hydraulic
- Pneumatic
- On-Board Diagnostics

Airlocks, Hatches and Doors

- Personnel/Containment Airlocks
- Equipment Hatches
- Specialty Doors

Cables and Connectors

- Safety-Related and Environmentally Qualified Products
 - Cable Assemblies
 - Electrical Penetration Assemblies
 - Grayboot and Blueboot Connectors
 - Single and Multi-Conductor Connectors
 - Class 1E Splice and Sealing Products
 - Safety-Related Instrument Racks

Outage and Fuel Management Equipment

- Reactor/Steam Generator Servicing Equipment
- Control Rod Servicing Equipment
- Nozzle Dams

Construction Products - Safety and Non-Safety

- Cable Trays
- Pipe Hangers and Accessories
- UNISTRUT® and B-Line® Metal Framing
- Safety-Related Hilti® Products

Fasteners and Precision Machined Components

- ASME, Safety-Related, Commercial Grade
 - Standard and Specialty Fasteners
- Specialty Parts Fabrication
- Anchors/Structural Bolting/Fittings
- Safety-Related Metal Framing Systems
- PlasmaBond® Metal Coating
- Innovative Bolting Solutions

Snubbers

- Large Bore Snubbers
- True Test-In-Place Manifolds

Fluid Sealing Products

- Tube Plugging and Sleeving Systems
- Mechanical Packing
- Gaskets and Textile Sealing Products
- Graphite Pressure Seals
- Specialty Sealing Products
- Mechanical Seals
- Expansion Joints

Spent Fuel Pool Products

- Fuel Storage Racks/Gates
- Neutron Absorbing Products
 - NETCO SNAP-IN® Rack Inserts
 - NETCO Pinserts® Fuel Bundle Inserts

Heat Exchangers

- Shell and Tube Support Products
 - Hydrostatic Test/Isolation Plugs
 - Heat Exchanger/Condenser Test Plugs
 - Specialty Tools

HVAC Systems - Safety and Non-Safety

- Purpose Built Chillers and Control Systems
- Air Handling Units
- Fans, Blowers and Motors
- Heating/Cooling Coils
- Dampers and Operators
- Ventilation and Filtration
- Air Filters
- HEPA Systems

Tensioning Devices

- HydraNut® Bolt Tensioning Systems
- Reactor Vessel Tensioners

I&C

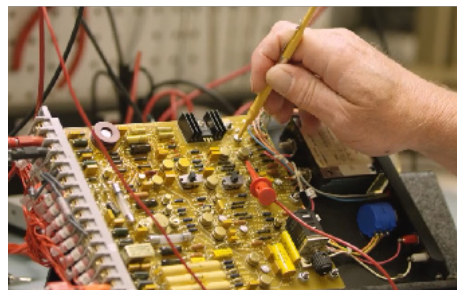

- Digital FPGA Relays
- Digital Safety Systems
- Thermal Dispersion Flow, Level, and Temperature Instruments
- Smart Products
 - Positioners
 - Controls/Diagnostics/Monitoring
- Analog/Digital Leak Rate Monitors
- Power Supplies
- Analog Controllers and Alarm Modules
- Indicating Meters
- Modern Analog Safety System

System Integration/Fabrication

- HVAC Systems and Equipment
- Tank and Vessel Fabrication
- Expansion Tanks
- Accumulators
- Skid Fabrication
- Custom Panels
- Motor Control Centers

Valves - Safety and Non-Safety

- Ball
- Diaphragm
- Gate, Globe, and Check
- Pressure Relief
- Single, Double, and Triple Offset Butterfly
- Solenoid Operated
- Thermostatic
- Valve Automation

Instrumentation and Controls

Construction Products

Nuclear Power Industry

Services

Design Engineering Services

- Engineering Services: Application, Design, Analysis, Document Evaluation
- Equivalency Studies
- Digital Upgrades
- Capacity Upgrades
- Plant Equipment Design
- Material Studies, Testing

Programmatic Engineering Services

- ASME Code Program Development, Review, Implementation
- Project Engineering/Management
- Licensing Consulting Services
- Engineering Programs: IST, ISI, LLRT, ILRT, IWE, IWL
- Plant Assessment
- QA/QC Services: Program Development, Procedure, Review, QA Oversight, Audits, Training
- QC Inspection Services: Civil, Electrical, I&C, Mechanical, Structural, Welding
- Staff Augmentation

Spent Fuel Management Systems

- BADGER Testing, Analytical Services and Laboratory Testing

NDE/NDT Services

- UT, MT, PT, ET, and VT Testing
- Training Programs
- SG Eddy Current Data Analysis
- Innovative Phased Array UT (PAUT) Applications
- Heat Exchanger Inspection (ET, RFT), Condition Assessment, Monitoring
- PDI-Qualified Examiners, Equipment
- Drone Inspection Services

Fluid Leak Management Services

- SealPROTM: Fluid Leak Management Program
- SealOETM: Web-Based Fluid Sealing Solutions
- Web-Based Stock Identification
- On-Site Valve Management
- Turn-Key Repacking
- Vendor Managed Inventory
- On-Site Technical Training

Obsolescence Support

- Mechanical and Electrical Reverse Engineering
- Repair/Refurbishment
- Substitution
- Special Manufacturing Runs
- Design Changes
- Proactive Obsolescence Planning
- Engineered Obsolescence Solutions (EOS)
- Third Party Replacement Parts
- Hydraulic and Pneumatic Controls
- Analog and Digital Control Modules
- Obsolete Item Replacement Database (OIRD)

Qualification, Testing and CGD

- Equipment and Environmental Qualification
- Commercial Grade Dedication (CGD) - Third Party
- Seismic Testing
- Flow Testing
- Containment Integrity Testing

Plant Performance and Processing Services

- Advanced Pattern Recognition (PdP)
- Condition Monitoring
- Equipment Reliability
- Regulation and Information Services
- Plant Process Computer Systems
- FAMOS Plant Performance Improvement Suite
- Radiation Protection Management
- Plant Monitoring Real Time Data Acquisition and Display Software (R-Time)
- Security Screening Information Systems
- Software Development
- Thermal Performance Training
- Worker In-Processing System (IPAA)

Supply Chain Management

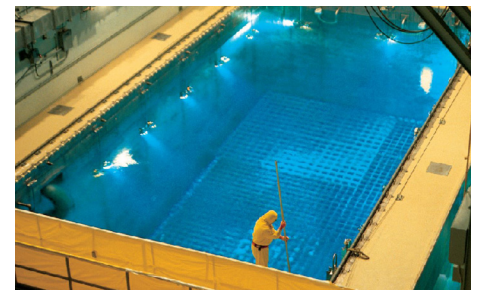

- RAPID Virtual Inventory Online Database
- Inventory Management, Cataloging, Standardization Programs

Nuclear Services: Field and Factory

- Maintenance, Repair, Rebuild Valves and Actuators
- Control Rod Drive Exchange/On-Site Rebuilding
- Heat Exchanger Services (Shell and Tube, Plate)
- Airlock Services
- Outage Support Services

Commercial Grade Dedication

Outage and Fuel Management
